AB - J09217012 Preparation of composite material(s)(I) composed of thermoplastic resin and layered clay mineral(s) comprises kneading mixt. composed of (A) and (B) under mixing index(Mix, defined in text) 30-200 m-3. (A) is layered clay mineral(s) having onium organic cpd(s). between the layers (B) are thermoplastic resin(s).

- USE - (I) is useful as moulding material.

- ADVANTAGE - (A) is dispersed in (B) homogeneously as fine particles.

(I) show improved flexural strength, flexural modulus, dyeing properties and heat resistance. (I) does not show chalking.
